

EUN KYOON KIM

ANDROID DEVELOPER · Kotlin & Jetpack Compose · Ex-Samsung Systems Engineer

+49-179-420-8962 · eunkyoon.kim@gmail.com · Berlin, Germany · [linkedin.com/in/eunkyoon-kim](https://www.linkedin.com/in/eunkyoon-kim) · github.com/katalog

SUMMARY

Android developer with 3+ years of dedicated mobile experience, built on 12 years of systems and embedded engineering at Samsung Electronics. Proficient in Kotlin, Jetpack Compose, and modern Android architecture (MVVM, Coroutines, Flow, Room). Shipped the award-winning berlinHistory app on the Google Play Store (50K+ downloads, DigAMus Award winner 2020, Grimme Online Award nominee 2021). Unique strength in bridging low-level systems engineering with high-level mobile application craftsmanship. Permanent resident of Germany, based in Berlin since 2021.

SKILLS

Android: Kotlin, Java, Jetpack Compose, MVVM, Room, Coroutines, Flow, Retrofit, ARCore

Languages: Kotlin, Java, C, C++, C#, WPF, Python

DevOps & Tools: Git, Jenkins, Bitrise, Docker, AWS, Jira

Systems / Embedded: OpenMP, Embedded OS Imaging, Remote Device Management

PROFESSIONAL EXPERIENCE

• Career Break · Following company insolvency

Aug 2024 – Present | Berlin, Germany

- Took an extended career break after Karlmax Berlin's insolvency.
- Completed Germany's Integration Course and passed the B1 German language exam.
- Obtained permanent residency (Niederlassungserlaubnis) in Germany.
- Recently resumed hands-on practice with Jetpack Compose in preparation for returning to the market.

• Android Developer · Karlmax Berlin GmbH & Co. KG

Sep 2022 – Jul 2024 | Berlin, Germany

- Contributed to the berlinHistory app (50K+ downloads, 4.3★, 219 reviews — Grimme Online Award nominee 2021, DigAMus Award winner 2020).
- Architected and expanded Map & Points of Interest features, improving navigation and engagement.
- Built high-performance UI: carousels, custom animations, complex custom views.
- Integrated ARCore for an immersive, spatial way to explore historical content.
- Established an automated screenshot-testing suite to catch UI regressions early.
- Supported a SpringBoot backend project in Java; documentation and testing.

• Freelance Android Developer · Moonkata (Self-employed)

Jan 2021 – Aug 2022 | Berlin, Germany

- Delivered custom Android solutions for diverse Korean clients, managing the full SDLC from requirements to Play Store deployment.

• Senior Software Engineer · Samsung Electronics Co., Ltd.

Jan 2008 – Jan 2020 | Suwon, South Korea

MAGICINFO DIGITAL SIGNAGE

- Lead Engineer for MagicINFO Player I, the core engine for Samsung's global signage solution.

- Built and optimized Jenkins CI/CD pipelines, reducing manual deployment errors and accelerating release cycles.
- Developed remote management protocols for Android-based display players, enabling centralized control of thousands of devices worldwide.
- Designed a fault-tolerant log management system on AWS for real-time remote diagnostics.
- Created an event script interface for on-the-fly media content updates, ensuring zero-downtime for global signage networks.

SYSTEMS & EMBEDDED ENGINEERING

- Built and deployed optimized Windows Embedded OS images (XP Embedded, WES 2009/7) for set-top box hardware.
- Developed Samsung Recovery, the official backup/recovery application, from scratch, ensuring 24/7 reliability for mission-critical hardware.
- Engineered DASH, a VNC-level remote access tool with both BIOS- and OS-level access, for hardware maintenance.
- Developed an automated audience measurement system using gender/age recognition algorithms for signage operators.

PERFORMANCE RESEARCH

- Leveraged OpenMP multi-core parallelism to optimize a printing engine, achieving a 300% performance boost.
- Developed a prototype multi-touch desktop application with device-seamless synchronization using C# and WPF.

• Software Engineer · Samsung Software Membership

Jan 2006 – Dec 2007 | Busan, South Korea

- Developed a 4-legged home security robot using C/C++, Java, and Linux.
- Built an ARMv7 emulator for x86 Windows for kernel-level software testing.
- Developed a Network Intrusion Detection & Prevention System (IDS/IPS) for Windows (WDM, NDIS).

EDUCATION

B.Eng. Computer Engineering
Busan University of Foreign
Studies
2000 – 2008

LANGUAGES

Korean — Native
English — Fluent
German — B1
